DIGITUS USB Graphic Adapter

DA-70831
EAN 4016032272489

The USB Display Adapter allows you to connect an additional display device (CRT/LCD monitor or projector) to the PC or notebook and effectively doubling the display working area. While reading email on one display, open attachments on the other screen; Expand spreadsheets across both monitors; in graphics programs increase the working area by putting all the pallets on the second display. Simply install the driver, plug the adapter into the USB 2.0 port and you're ready to go. By using USB there is no need to open the computer for installation.

Logistical Information

Packaging Unit (pcs)	40
Packet weight (kg)	0.2175
Box weight in kg	8.7
Country of origin	Taiwan

Extends your desktop workspace (dual display support)
